Jeff Robshaw
CIO & Vice President – Learning Innovation
Gateway Technical College
3520 30th Avenue
Kenosha, WI 53144

Dear Google Executives:

Gateway Technical College offers its strong support for the county’s effort to partner with Google to provide ultra-high speed data access to the home. This innovative project not only provides leadership and a model for future infrastructure to the end user, but also provides an opportunity to deliver high-bandwidth educational offerings to residents of our community.

Gateway Technical College is an associate-degree granting institution which provides training, education, and support for economic development through its educational program offerings, certificate programs, and business-focused specialized coursework. We serve up to 30,000 individuals annually in our three county region which includes Walworth, Racine, and Kenosha counties.

The college’s alternative delivery course and program offerings are exploding in volume. Ultra-high speed connectivity to the home will enable a richer multimedia learning experience for students seeking our specialized training and our associate degree programs. As a high-tech educational institution, one of our goals is to provide rich online, blended, and traditional learning opportunities to meet the demands of Kenosha’s workforce. Flexible options that incorporate technology are dependent on high speed data connectivity to people’s homes. Fiber optic infrastructure will enable us to deploy multimedia rich learning content to our students living in the Kenosha area.

The college has previously partnered with Kenosha County and the Kenosha Unified School District on a pioneering effort to expand fiber optic capacity in our region. This partnership meets the infrastructure needs of each consortium member and provides additional fiber access for businesses that desire a broadband infrastructure to deploy their services. The addition of Google as a partner in our region would support our efforts to revitalize our economy while at the same time offering a channel for expanded training and education for our citizens.

Gateway is proud to support this forward-thinking project.

Sincerely,

Jeff Robshaw
