Kenosha WI 53140

Re: Google Ultra-high Speed Broadband Network

Dear County Executive Kreuser,

I am writing this letter in support of Kenosha County to apply for Google's ultra-high speed broadband network. This network would help with Local Government, Healthcare, K-12 schools, Community Centers, Libraries, Community Colleges, Higher Education and Businesses as well as residents that are located in Kenosha County.

As you know Kenosha County has defined and developed a much needed plan to build, upgrade, extend, and deliver high-speed broadband internet connectivity to Kenosha County. The importance and key benefits to our community are:

- Economic – Key component to spur economic development and supports priority strategies identified in the Economic Development Strategy for Kenosha County
- Education – Support long distance learning for remote and dispersed students, researchers and allow educators to collaborate and share information
- Healthcare – Promotes telemedicine with healthcare professionals where video is often not otherwise possible
- Public Safety – Provide the backbone for an enhanced public safety communication system improving safety and data interoperability across multiple jurisdictions
- Competition – Fosters competition with the predominant cable and telecommunication Internet providers

The Town of Bristol is in full support for the County to apply for this great opportunity and to participant in this program. We respectfully request the County to apply for this grant.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Fisch".
