ORDER EARLY - LIMITED SUPPLY - CHECKS WILL BE RETURNED IF YOUR ORDER CANNOT BE FILLED

FULL PAYMENT MUST BE INCLUDED WITH THE ORDER. NO REFUND/WARRANTY ON ALL PRODUCTS

COMMON NAME	DESCRIPTION AND CHARACTERISTICS
AMERICAN PLUM GROWTH RATE - MEDIUM	Medium to tall tree/shrub for farmstead windbreaks, highway and riparian plantings. Adapted to a wide variety of soil types. Fair to good drought tolerance. Full sun to partial shade. Bears white flowers in spring, and yellow to red edible fruit in June-July.
BALSAM FIR GROWTH RATE – SLOW	This pyramidal evergreen will grow in cool, moist and swampy areas. Dark flat needles ½-1” long, slow growing, symmetrical, evergreen tree. Soft, bright green needles. Nice fragrance for Christmas trees. Mature height 75’.
BLACK CHERRY GROWTH RATE - MEDIUM	Grows best in dry soils with full to partial sun. Average height can be up to 40’. Leaves are shiny dark green in summer turning to orange in the fall. The tree has white flowers and develops small purple to black fruit, which is attractive to wildlife.
BLACK WALNUT GROWTH RATE - MEDIUM	The Black Walnut is prized for its nuts and attractive hardwood. This tree likes deep, rich, well-drained soil; grows more slowly in drier soils. Grows to 50’ to 75’, 60’ spread. Black Walnut roots transmit a growth-inhibiting chemical which keeps many other trees and plants from growing near it. Horses may be affected by black walnut chips or sawdust when they are used for bedding material.
BLACK HILLS SPRUCE GROWTH RATE - MEDIUM	Desirable, dense symmetrical cone shape to this evergreen conifer. Bright-green needles mature to an interesting blue-green. Great landscape accent, very useful as windbreak or screening. Full sun. Slow grower to 20 to 25 feet tall, 10 to 12 feet wide, can be larger with time. Shapely “Christmas” tree type ornamental, with short bluish foliage.
BUTTON BUSH GROWTH RATE - FAST	A small bush that bears attractive summer foliage with creamy-white flowers appearing in late summer. Easily grown in moist, humusy soils in full sun to part shade. Grows very well in wet soils, including flood conditions and shallow standing water. Adapts to a wide range of soils except dry ones. Flower heads are very attractive to bees and butterflies.
BUTTERFLY BUSH GROWTH RATE - FAST	Grows best in well-drained soil with full sun. Called the summer lilac due to its similar fragrant flowers that bloom all summer. A magnet for all the butterflies who pass through your garden seeking nectar. A fast growing shrub that matures to 10-15’ if not cut back.
COLORADO BLUE SPRUCE GROWTH RATE - SLOW	Grows best in full sun, in moist, well-drained, fertile soils. Grows over 35’ and needles are stiff, short, and silvery blue to greenish blue in color. Tree is conical shaped.
COMMON LILAC GROWTH RATE - MEDIUM	The Common lilac is noted for its showy, fragrant bloom in the late spring. Flowers come in many colors ranging from white, pink, blue, lavender to reddish-purple. Grows best in well drained, fertile soils, under full sunlight. Average height is 15’.
DAWN REDWOOD GROWTH RATE - FAST	Dawn redwoods are deciduous coniferous trees - that is the trees produce cones but lose their foliage in the fall. They enjoy full sun and moist, deep, well drained soil. They withstand flooding and are somewhat drought tolerant. A fast grower, Dawn Redwood reaches 70’ - 100’ in height with a 25’ spread. Dawn redwood trunks are remarkably straight and the tree grows in a tall, slender, pyramidal shape. They are hardy and care-free. The leaves turn a lovely cinnamon-bronze in fall.
FRAGRANT SUMAC GROWTH RATE- FAST	a.k.a. Aromatic Sumac grow to a height of 3 to 8 feet and a spread of 6 to 8 feet. The foliage is green in summer and scarlet in fall. Small yellow flowers bloom in the spring. In late July, scarlet berries mature in dense, round clusters that persist through winter. Fragrant sumac provides quality nesting, roosting and loafing cover for a variety of songbirds and game birds.
FRASER FIR GROWTH RATE - MEDIUM	Often referred to as the Cadillac of Christmas trees. This tree has an excellent fragrance with exceptional needle retention. Full to partial sun. Likes cool, moist, well-drained soils.
HAZEL NUT GROWTH RATE- FAST	A large fast growing shrub with showy spring flowers. The Hazel Nut can grow to 8-12’ tall with a crown spread of 10’, creating a dense privacy screen, perfect for a hedgerow and as nesting sites for birds. The nuts of this American Hazel Nut have a higher nutritional value than acorns and beechnuts, making them a valuable food source for wildlife. The edible nuts that mature in September-October are eaten by deer, squirrels, foxes, northern bobwhite, turkey, woodpeckers, ruffed grouse, and pheasants.
NANNYBERRY GROWTH RATE - FAST	Nannyberry is a large, upright, multi-stemmed, deciduous shrub which typically grows to 10-18’ tall with a spread of 6-12’, but may also be grown as a small, single trunk tree which may reach a height of 30’. Non-fragrant white flowers appear in spring. Flowers give way in autumn to blue-black, berry-like drupes which often persist into winter and are quite attractive to birds and wildlife. Variable fall color ranges from drab greenish-yellow to reddish-purple.
RED MAPLE GROWTH RATE – FAST	Brilliant fall coloring is one of the outstanding features of the Red Maple. This tree prefers full sun to partial shade and tolerates both extremely wet to extremely dry soils. The Red maple is prized as an ornamental shade tree because of its rapid growth, reaching heights of 40-70’ tall. Leaves have a silvery underside and turn a pale yellow in the fall.
RED OSIER DOGWOOD GROWTH RATE- FAST	Grows best in moist to wet soils with full sunlight. Average height is 8’ and it spreads outward to 6’. Has bright red twigs with white flowers and white berries in the summer. Leaves turn dark red in the fall.
RUGOSA ROSE GROWTH RATE - FAST	The Rugosa Rose is a shrub mainly used as a hedge that has beautiful pink flowers that continually bloom from June through August and are 2 1/2 to 3 1/2 inches in size. It develops 1 inch red berries in August which last through the winter to provide food for wildlife. Grows to a height of 6’ high and 6’ wide.
SCARLET OAK GROWTH RATE – FAST	Scarlet oak, also called black oak or red oak is best known for its brilliant autumn color. It is a large rapid-growing tree found on a variety of soils in mixed forests, especially light sandy and gravelly upland ridges and slopes. Scarlet oak is a popular shade tree and has been widely planted in the United States. Scarlet oak is a medium-sized tree, normally maturing when 60 to 80 ft. Beyond its value as a timber and wildlife species, scarlet oak is widely planted as an ornamental. Its brilliant red autumn color, open crown texture, and rapid growth make it a desirable tree for yard, street, and park.
SUGAR MAPLE GROWTH RATE – MEDIUM	The Sugar Maple is a landscape standout. Medium to dark-green leaves turn yellow, burnt orange or red in fall. Tolerates shade, likes a well-drained, moderately moist, fertile soil. Do not plant in confined areas or where salt is a problem. Grows to 60’ to 75’, 40-50’ spread. The sugar maple tree is the principal source of maple sugar.
SWAMP WHITE OAK GROWTH RATE – FAST	Swamp white oak is a medium sized tree of the north central and northeastern mixed forests. It is found in lowlands, along edges of streams, and in swamps subject to flooding. It is rapid growing and long lived, reaching 300 to 350 years. The hard strong wood is commercially valuable and is usually cut and sold as white oak. Many kinds of wildlife eat the acorns, particularly ducks.
TECHNY ARBORVITAE GROWTH RATE – MEDIUM	Shimmering emerald green foliage. Great for hedges or screens. A popular evergreen that has dark green soft foliage. Can grow 30+ ft tall and 15+ft wide. This tree can live 100-years or longer. Does not do well in sandy soil.
WHITE FLOWERING DOGWOOD GROWTH RATE - MEDIUM	The White Flowering Dogwood has an excellent show of white blossoms in spring, and bright red berries in fall and winter. It is a low branching tree that spreads horizontally and has a semi-rounded top. Does best in sun to part shade. This deciduous tree does best in well-drained acid soil. It has a mature height of 30’ and a mature spread of 20’.
WHITE PINE GROWTH RATE - FAST	The White Pine is a hardy, valuable tree. Clustered soft blue-green needles. Ideal screen or windbreak. Likes moist, well-drained soils. Grows 50’ to 80’ with a 20-40’ spread.
CANOE BIRCH GROWTH RATE – FAST	The Canoe birch also called white birch, paper birch, or silver birch is a medium-sized, fast-growing tree that reaches 70 feet with a pyramidal or irregular crown, often with several trunks. The handsome foliage and showy white bark make the trees attractive for landscaping. They are important browse plants for animals, and the seeds, buds, and bark are also eaten by wildlife.
